DETAILED ACTION

Response to Arguments

Applicant's arguments filed 3/4/04 have been fully considered but they are not persuasive.

Applicant argued that Rogers does not teach the central database sending a response message comprising further information requested by the central database from a further information database. Applicant cited Rogers col. 4 lines 64-68 and col.5 lines 29-36 "... one can access data on multiple databases of different types using a single request from a client." as support for the reading that Rogers' client is accessing the data, not the central database.

The argument is not persuasive. The argument is not persuasive because Rogers' system enables a client to make a single request to a central database (DIS). The central database (DIS) is the one who make further requests for information from multiple databases. The DIS is responsible for gathering and format appropriate information from the various database and present the result to the client. See Rogers col.4 lines 55-60, and col. 5 lines 10-27. Since the client is making only one request to the DIS, it follows that requests for information from the multiple of databases is not make by the client. If the client is the one making the requests to the

multiple databases as argued by applicant, then the client is making multiple requests - not a single request.

Claims 2-7, 10-12, 14-16, 18-20, 23 and 25-39 are rejected as stated in the prior office action (paper #6).
